## Abstracts

The global Building Security and Control Systems market size is expected to reach \$ 150483 million by 2032, rising at a market growth of 7.4% CAGR during the forecast period (2026-2032).

Building Security and Control Systems refer to integrated security protection and building control systems deployed in commercial buildings, residential complexes, campuses, hospitals, schools, data centers, hotels, and public facilities. These systems typically encompass access control, video surveillance, intrusion detection, visitor management, fire safety integration, building automation, lighting control, HVAC control, parking and elevator integration, energy management, and unified management platforms. Their core function—facilitated through sensors, controllers, cameras, card readers, actuators, management software, and cloud platforms—is to enable the centralized monitoring, automated control, and intelligent management of personnel movement, security risks, equipment operation, environmental comfort, and energy consumption within a building space.

In the past, security and building automation systems were typically deployed independently; today, however, an increasing number of buildings seek to unify access control, video surveillance, fire safety, HVAC, lighting, energy management, and visitor management onto a single management platform to enhance operational efficiency and emergency response capabilities. Honeywell notes that integrating access control systems with video surveillance and intrusion detection creates a more comprehensive and complete security solution; similarly, Johnson Controls emphasizes that the future trajectory of building technology lies in intelligent integration and centralized control. Video surveillance has evolved beyond mere video recording and storage, upgrading to encompass advanced capabilities such as facial and vehicle recognition, perimeter

intrusion detection, unattended object detection, abnormal behavior analysis, crowd analytics, and automated security event alerts.
