Abstracts

The global Built-in Vacuum Sealing Drawers market size is expected to reach \$ 163 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

In 2025, global sales of Built-in Vacuum Sealing Drawers reached approximately 52,000–62,000 units, with an average market price of about USD 1,700–2,200 unit, an annual production capacity of roughly 55,000–68,000 units, and an industry-average gross margin of approximately 30%.

Built-in Vacuum Sealing Drawers are drawer-format vacuum sealing appliances designed for integration into premium kitchen cabinetry or built-in appliance systems. They typically combine a drawer chamber, vacuum pump, sealing gasket, heat-sealing bar, control interface, vacuum bags, and optional container or bottle adapters to remove air from food packages, containers, or liquids and then seal them for preservation, portioning, marinating, meal preparation, and sous-vide cooking. These products are commonly positioned as companion appliances for steam ovens, combi-steam ovens, warming drawers, blast chillers, and other high-end built-in kitchen modules. Key product parameters generally include installation width, drawer height, chamber volume, vacuum level, sealing level, compatible bag size, liquid-vacuum capability, external vacuuming interface, and integration style. In market research terms, the core product is defined by the combination of built-in installation, drawer-style structure, vacuum extraction, and food sealing or packaging functionality.
