The global Bulk Fibre Cable market size is expected to reach \$ 364.2 million by 2029, rising at a market growth of 1.9% CAGR during the forecast period (2023-2029).

As the demand for high-speed internet and data transmission continues to grow, the development of bulk fibre cable has a promising future. Bulk fibre cable is a type of cable that contains multiple fibre optic strands, which are used to transmit data at high speeds over long distances.

One of the main advantages of bulk fibre cable is its ability to transmit large amounts of data quickly and efficiently. This makes it ideal for use in a variety of applications, including telecommunications, data centres, and cloud computing.

In addition, the increasing adoption of 5G technology is expected to drive the demand for bulk fibre cable even further. 5G networks require high-speed and low-latency connections, which can be achieved through the use of fibre optic cables.
