The bullet IP camera is a type of surveillance camera that is shaped like a long, cylindrical bullet. It is designed for outdoor use and is known for its compact size, weatherproof housing, and ease of installation. Bullet IP cameras are typically equipped with high-resolution image sensors, infrared night vision capabilities, and advanced video compression algorithms. These cameras connect to a network via Ethernet or Wi-Fi, allowing for remote viewing and monitoring through computer systems or mobile devices. The bullet shape of these cameras provides flexibility in mounting options, making them commonly used for outdoor security applications where visibility and deterrence are important.

The industry trend of bullet IP cameras is focused on higher resolution, advanced video analytics, and increased connectivity options. As surveillance technology advances, bullet IP cameras are now available in ultra-high-resolution formats such as 4K and even 8K, providing clearer and more detailed images. Additionally, there is a growing demand for advanced video analytics features like motion detection, object tracking, and facial recognition, enabling smarter and more efficient security systems. Furthermore, bullet IP cameras are increasingly offering multiple connectivity options, including Power over Ethernet (PoE), Wi-Fi, and cloud-based storage, providing more flexibility and convenience for users. The industry is dedicated to developing bullet IP cameras with improved image quality, advanced features, and enhanced connectivity to meet the evolving needs of security applications.
