Abstracts

According to our (Global Info Research) latest study, the global Bulletproof Helmet market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Bullet proof helmets are used for enhancing safety in defense, military, and homeland security. They are used by wearers for protection from potentially hazardous elements that range from air-borne flying particles, ballistic threats, and fragments.

The increasing demand for bulletproof helmets arising due to various law enforcement activities will drive the growth prospects for the global bulletproof helmet market during the forecast period. Some of the factors that determine the need for proper law enforcement across regions include political, social, and socio-cultural elements. For instance, India is focusing on security cooperation, economic integration and the modernization of police forces through the Modernization of State Police Forces (MPF) Scheme. This scheme also reduces the dependence of state governments on the Army and the Central Armed Police Forces for the purpose of controlling law and order issues in the state by strengthening and equipping the State Police Forces. Furthermore, in APAC, the increasing instances of terrorist attacks, rising flow of terrorist fighters from countries in the Middle East such as Syria and Iraq, and groups espousing support for the Islamic State of Iraq and the Levant (ISIL) results in the enhancement of domestic law by the government.
