Abstracts

Bullet proof helmets are used for enhancing safety in defense, military, and homeland security. They are used by wearers for protection from potentially hazardous elements that range from air-borne flying particles, ballistic threats, and fragments.

Scope of the Report:

This report focuses on the Bulletproof Helmet in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The increasing demand for bulletproof helmets arising due to various law enforcement activities will drive the growth prospects for the global bulletproof helmet market during the forecast period. Some of the factors that determine the need for proper law enforcement across regions include political, social, and socio-cultural elements. For instance, India is focusing on security cooperation, economic integration and the modernization of police forces through the Modernization of State Police Forces (MPF) Scheme. This scheme also reduces the dependence of state governments on the Army and the Central Armed Police Forces for the purpose of controlling law and order issues in the state by strengthening and equipping the State Police Forces. Furthermore, in APAC, the increasing instances of terrorist attacks, rising flow of terrorist fighters from countries in the Middle East such as Syria and Iraq, and groups espousing support for the Islamic State of Iraq and the Levant (ISIL) results in the enhancement of domestic law by the government.

According to the report, the defense expenses of regions such as APAC, the Americas, Western Europe, and ROW are on the rise, where each country determines its military and defense expenses based on its political and social environment. The US allocated

over \$500 billion on defense spending in 2015. The other countries with substantial budgets for the armed forces are China, Saudi Arabia, Russia, the UK, India, France, and Japan.

Further, the report states that the challenge faced by the vendors of bulletproof helmets is that a number of regions are underpenetrated by defense suppliers in developing countries in regions such as Central and South America, Central and Eastern Europe, Africa, and Southeast Asia. The armed forces in most countries in these regions are undersupplied. Sometimes in developed country like the US too there were instances of supply shortages of ballistic helmets.

The worldwide market for Bulletproof Helmet is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
