According to our (Global Info Research) latest study, the global Bundled Peripheral Packaging market size was valued at US\$ 21076 million in 2025 and is forecast to a readjusted size of US\$ 32585 million by 2032 with a CAGR of 6.4% during review period.

Bundled peripheral packaging refers to secondary or outer packaging solutions designed to group multiple products together for transportation, retail display, and promotional sales, typically including shrink wrap, stretch film, paper bundling sleeves, corrugated trays, straps, and banding materials. These packaging solutions are widely used in fast-moving consumer goods (FMCG), beverage multipacks, electronics accessories bundling, e-commerce logistics, and industrial shipment consolidation. From a value chain perspective, upstream includes polyethylene and polypropylene resins, paperboard, corrugated materials, adhesives, and strapping materials; midstream focuses on film extrusion, printing, die-cutting, sealing technology, and automated bundling machinery integration; downstream demand is driven by food and beverage manufacturers, electronics brands, logistics providers, supermarkets, and online retailers. In 2025, the average selling price of bundled peripheral packaging is approximately US\$0.16 per unit, with global sales volume reaching around 128,000 million units. The industry maintains a gross margin of 18%–32%, supported by scale efficiency, raw material cost control, customization capability, and automation adoption.
