Buoy lights are illuminated signals attached to buoys, which are floating navigational aids used to mark channels, hazards, or specific areas in bodies of water. These lights help vessels navigate safely, especially at night or in poor visibility conditions, by providing color-coded and flashing signals that correspond to specific meanings and locations on nautical charts. The light colors?commonly red, green, or white?indicate the side of a channel or the type of hazard. Buoy lights are essential in guiding mariners, preventing collisions, and aiding in the efficient and safe movement of vessels.
