Abstracts

According to our (Global Info Research) latest study, the global Bus QR Code Scanner market size was valued at US\$ 228 million in 2025 and is forecast to a readjusted size of US\$ 403 million by 2032 with a CAGR of 8.5% during review period.

In 2025, the global production of bus QR code scanners reached 310,000 units, with an average selling price of US\$715 per unit. Bus QR code scanners are onboard front-end ticket verification terminals in public transportation automatic fare collection systems. They are typically installed near bus doors, the driver's seat, or BRT stations to read paper QR codes and dynamic QR codes from mobile phones. They are also compatible with NFC/RFID transportation cards and cEMV bank cards/mobile wallets, completing a full set of ticket verification actions including ticket recognition, transaction verification, fare deduction or accounting, voice/light feedback, transaction uploading, blacklist/whitelist verification, and linkage with the back-end clearing and ticketing system. Application scenarios include city buses, BRT, suburban buses, and park/airport shuttle buses. The upstream of the industry chain mainly consists of 2D barcode/QR code scanning modules, NFC/RFID reader/writer modules, EMV payment kernels and security authentication, SAM/security modules, processors, storage, displays, buzzers, 4G/Wi-Fi/GNSS communication modules, automotive-grade power supplies, and protective housings. The midstream consists of OEMs; the downstream includes bus groups, transportation authorities, ticketing clearing platforms, acquiring banks/card organizations, MaaS/App service providers, and operation and maintenance service providers. Gross profit margin is approximately 15%–35%.
