According to our (Global Info Research) latest study, the global Busbar Clamp Insulator market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Busbar clamp insulators perform an ancillary function within most electrical systems, they can be critical for maintaining a device's operational capability. A busbar system standoff insulator typically supports a conductor at a distance from the surface, or substrate, to which it is attached. The insulator's high electrical resistance prevents the unintentional flow of current between a conductor and surrounding objects, effectively reducing the potential for power damage and energy waste.
