Busbar trunking is a system consisting of prefabricated electrical distribution system covered in a highly protective enclosure, which basically includes components such as fittings, devices, straight lengths, elbows and accessories.

Scope of the Report:

This report focuses on the Busbar Trunking Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Rising demand for reliable and uninterrupted supply of electricity in developing economies coupled with stringent government directives to curb T&D losses will drive the market. Ease of installation, low costs and the ability to effectively transmit bulk power over long distances have significantly favored the adoption of these products over traditional cables. Rapid urbanization backed by growing construction and infrastructure spending will further complement the product penetration. Growing investments to modernize the aging electricity network coupled with increasing adoption of smart grid technology will significantly enhance the busbar trunking system market. Installing such system avoids the plethora of cables in power transmission network and can reduce the ample space covered by the cables. Minimal heat dissipation, flexibility of tap-off locations, and trifling fire risks will positively impact its adoption globally. As per International Energy Agency (IEA), an estimated investment of USD 9.7 Trillion must be made to meet the global generating capacity till 2035 along with USD 7.2 Trillion to replace and install T&D grids.

In recent times, aluminum conductors are being widely used in North America. This region holds a major share of the global busbar trunking systems market, followed by

Europe. Due to growth of manufacturing industries and commercial buildings in Asia Pacific, the market in the region is anticipated to expand at a significant rate during the forecast period.

The worldwide market for Busbar Trunking Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
