Abstracts

The global Business Email Compromise Solution market size is expected to reach \$ 248 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

Business Email Compromise Solution is a security system specifically designed to identify, block, and defend against social engineering attacks targeting corporate email. Business email intrusion attacks typically impersonate executives, suppliers, or partners, tricking employees into transferring funds or leaking sensitive information, without relying on traditional malware. This solution uses artificial intelligence and machine learning technologies to analyze email behavior patterns, sender identity, language anomalies, and domain spoofing, detecting spoofed emails, fraudulent requests, and compromised internal accounts in real time. Core functions include sender authentication (SPF/DKIM/DMARC), anomaly detection, threat intelligence integration, and user security awareness training. This solution can be integrated into email gateways, cloud email systems (such as Microsoft 365 and Google Workspace), or served as a standalone API service. Widely used in industries such as finance, manufacturing, energy, and foreign trade, it is a key tool for preventing social engineering attacks and reducing financial losses and data breaches.

The global landscape for Business Email Compromise Solutions is dominated by North America, driven by compliance in Europe, and rapidly catching up in the Asia-Pacific region. North America is the largest market, experiencing frequent BEC attacks (FBI internet crime reports billions of dollars in losses annually), with companies like Proofpoint and Mimecast leading the way, and high adoption rates of cloud email security and AI detection. In Europe, influenced by GDPR and NIS2 directives, companies are prioritizing data protection and email compliance, increasing demand for

localized services. The Asia-Pacific region is experiencing the fastest growth, with rising BEC attacks on Chinese manufacturing and foreign trade companies, prompting local security vendors (Qi An Xin, Microstep Online) to accelerate their deployments. Future trends include generative AI detection of spoofed emails, real-time authentication, integrated user behavior analysis and security awareness training. Key obstacles include limited budgets for SMEs, the difficulty of traditional email gateways in detecting social engineering attacks, high employee false positive rates, and difficulties in tracing cross-border attacks. Dynamically, Microsoft and Google are strengthening native BEC protection, DMARC deployment rates are continuously increasing, and insurance institutions are requiring companies to deploy BEC protection to obtain cyber insurance.

This report studies the global Business Email Compromise Solution demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Business Email Compromise Solution, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Business Email Compromise Solution that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Business Email Compromise Solution total market, 2021-2032, (USD Million)

Global Business Email Compromise Solution total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Business Email Compromise Solution total market, key domestic companies, and share, (USD Million)

Global Business Email Compromise Solution revenue by player, revenue and market share 2021-2026, (USD Million)

Global Business Email Compromise Solution total market by Type, CAGR, 2021-2032, (USD Million)

Global Business Email Compromise Solution total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Business Email Compromise Solution market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Proofpoint, Mimecast, Check Point, Cisco, Agari, Trend Micro, Zix, Barracuda Networks, GreatHorn, Abnormal Security, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Business Email Compromise Solution market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
