Abstracts

Business intelligence software is an important tool or application used by organizations to analyze data and make improved real-time market decisions. Traditionally, business intelligence was used only for reporting, designing dashboards, and resolving queries. Its goal was to track key business performance and metrics.

Scope of the Report:

During 2017 the cloud-based social intelligence solutions segment accounted for almost 70% of the total share of the market and dominated the industry. Cloud-based solutions come with a regular minimal payment and eliminates the need for making a large one-time investment and also the periodic expenses for maintenance and updates. Predictable expenses, no requirement of a powerful local server, minimal requirement of skilled personnel, and free upgrades are additional benefits that will induce more businesses to prefer hosted business intelligence solutions in the next few years.

The enterprises segment dominated the social business intelligence market during 2017. This segment includes several industries such as retail, IT, BFSI, healthcare, and telecommunication. These industries use business intelligence for predictive analysis as it helps them in segmenting products and services based on the preference of their customers. The higher adoption of business intelligence software by SMEs, the rise in a number of online retail customers, and the favorable government policies in the healthcare and BFSI industries will drive the growth of this market segment. The global Business Intelligence (BI) market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Business Intelligence (BI).

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.

This report studies the Business Intelligence (BI) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Business Intelligence (BI) market by product type and applications/end industries.
