According to our (Global Info Research) latest study, the global Busway-Bus Duct market size was valued at US\$ 12060 million in 2024 and is forecast to a readjusted size of USD 16880 million by 2031 with a CAGR of 5.0% during review period.

Busway-Bus Duct is a closed metal device composed of copper and aluminum bus bars, which is used to distribute large power for each component of the distributed system. In the indoor low-voltage power transmission trunk project, more and more wires and cables have been replaced.

Bus duct provides flexible power distribution solutions for a variety of applications where change and adaptation are important. It offers a complete line of compatible, sandwich-type feeder and plug-in bus duct lengths and fittings. According to the different insulation way, bus duct is divided into BMC, CMC and CFW. CMC is the most widely used type which takes up about 59.6% of the global market.

China is the largest production country of bus duct in the world in the past few years and it will keep the same position in the next few years. China took up about 40% the global market.

The main manufacturers of Global Bus Duct include Schneider Electric, Siemens, ABB, Eaton, etc. These top four manufacturers hold a market share about 30%. In terms of application, the product is mainly used in commercial building, followed by industrial building.
