## Abstracts

The global Butane Burners market size is expected to reach \$ 206.6 million by 2029, rising at a market growth of 5.8% CAGR during the forecast period (2023-2029).

Butane burners are often used for outdoor cooking, camping, picnicking, and other recreational activities. The popularity of outdoor and portable cooking equipment has been on the rise. Butane burners are also used in small household appliances, such as portable stoves and countertop burners. These appliances provide an alternative to traditional gas or electric stoves and are favored in compact living spaces. Innovations in butane burner design often include safety features like automatic shut-off mechanisms and flame control, appealing to safety-conscious consumers. The rise in home cooking and culinary experimentation has driven demand for specialized butane burners, such as those used for sous-vide cooking or crème brûlée caramelization. Butane burners are used in professional catering and foodservice settings, particularly for events and outdoor catering, contributing to commercial demand.
