## Abstracts

The global Butane Gas Cartridges market size is expected to reach \$ 627 million by 2032, rising at a market growth of 3.3% CAGR during the forecast period (2026-2032).

Butane gas cartridge is one of the most efficient ways of storing fuel. Gas cartridges generally comprise a mixture of propane and butane contained under high pressures. Gas cartridges are generally made of metal for better storage functions. Furthermore, only butane gas equipped cartridges are also available in the market. Some of the major advantages butane gas cartridges provide to end users include their highly portable nature and light weight. Another coveted quality of butane gas cartridges include the ability to effectively monitor and control the flame, which dismisses multiple safety concerns surrounding these devices. The pressure in the butane gas cartridges is generally released by opening of a stove valve. Generally gas fuels are being preferred over liquid fuel cartridges owing to less weight and gas fuels burns cleaner than liquid or solid fuels.

Global Butane Gas Cartridges key players include Taeyang, Maxsun, Marina, Onezone Gas, Coleman, etc. China is the largest market, with a share about 25%, followed by Europe, with a share about 20 percent. In terms of product, 220-250 g/Unit is the largest segment, with a share about 65%. And in terms of application, the largest application is Stoves, followed by Food & Beverage, Medical, etc.
