The button battery automatic production line is an automated production system designed specifically for assembling button batteries. The button battery automatic production line integrates advanced automation technology to achieve full process automation from material handling, manufacturing and processing to quality inspection and packaging. This production line closely connects a series of production equipment through intelligent control to form an efficient and precise battery production process. The production line widely uses automated equipment such as robots, conveyor belts and automatic testing instruments, which can complete tasks quickly and accurately and can be customized according to needs. While reducing manpower and resource investment, the automated production line also reduces pollution to the environment. For example, modern button batteries mostly use mercury-free design, which reduces the use of harmful substances.
