The global Button-Type Silver Oxide Battery market size is expected to reach \$ 1741 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Button-Type Silver Oxide Battery is a compact primary battery specifically designed in a button-cell form factor to deliver stable voltage output, high energy density, and long-lasting discharge for precision electronic applications. Compared with conventional formats, it emphasizes miniaturized structure, precise electrode configuration, and enhanced sealing to ensure reliable performance in space-constrained devices such as calculators, watches, and medical equipment where voltage consistency is critical. In 2025, the capacity utilization rate reached 85%, while the industry's average gross margin was approximately 35%, reflecting strong value retention driven by performance-sensitive applications. Production in 2025 was 2,250 million units, with an average price of 0.6 USD per unit. Upstream, the industry relies on high-purity silver oxide powder and zinc powder, with representative suppliers including Umicore, Mitsui Mining & Smelting, Zijin Mining, and Hunan Silver. Midstream focuses on electrode preparation, precision cell assembly, sealing, and quality control to ensure stable electrochemical performance and safety. Downstream demand is primarily driven by calculators, watches, and medical devices, with key customers including Casio, Seiko, Citizen, Medtronic, and Philips.

Button-Type Silver Oxide Battery is a compact primary battery that utilizes a silver oxide cathode and zinc anode to deliver stable voltage output and high energy density for precision, low-drain electronic devices. Compared with other button cell chemistries, it offers superior voltage stability, low self-discharge rate, and reliable performance under continuous load, making it particularly suitable for applications requiring consistent

power such as watches, medical instruments, and miniature electronic devices. Its electrochemical system ensures enhanced leakage resistance and long service life, supporting high reliability in space-constrained environments.
