Abstracts

According to our (Global Info Research) latest study, the global C-Mount Extension Tube market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

C-Mount Extension Tubes are designed to act as spacers for C-Mount and CS-Mount instruments. These extension tubes increase the image distance between the lens and the camera sensor. This allows the lens to focus on objects at a shorter distance than would be possible without the spacer. The reduction in object distance increases the magnification of the image on the camera sensor, while decreasing the depth of field.
