C2S Paper is a type of paper that is coated on both the front and back surfaces to enhance its smoothness, brightness, and printability. The coating, typically made of materials like clay or calcium carbonate, helps the paper achieve a glossy, matte, or satin finish, making it ideal for high-quality printing. C2S paper is commonly used for applications requiring vibrant, detailed images such as magazines, brochures, packaging, and catalogs. Its double-sided coating allows for consistent print quality on both sides, making it a preferred choice for double-sided printing projects.
