According to our (Global Info Research) latest study, the global C70250 Alloy market size was valued at US\$ 55.24 million in 2025 and is forecast to a readjusted size of US\$ 92.36 million by 2032 with a CAGR of 7.7% during review period.

Alloy C70250 is a high-performance Alloy that combines strength, conductivity, formability and stress relaxation resistance into a unique set of properties. C70250 has the qualities of some of the Beryllium Coppers without containing any Beryllium. The alloy is a thermally aged material. It achieves its properties by combinations of cold work and heat treatments, all of which is done at the mill. The alloy's high strength and conductivity combined with its formability and stress relaxation properties make C70250 an excellent electronic alloy, particularly in high temperature environments.
