A cab or taxi service is a type of vehicle for hire with a driver, used by a single or small group of passengers on either sharing or non-sharing basis. The passenger hires a taxi for a defined route, which is pre-decided by the customer passenger. The taxi cab conveys passengers between locations of their choice. The cab service differs from other modes of public transport, where the pick-up and drop-off service locations are determined by the service provider and not by the passenger.

According to the report, one of the major drivers for this market is Growing use of cashless transaction in e-hailing and integration with digital wallets. The cash-based payment system for cab riders has been replaced by in-app payment system, which uses digital wallets. A surge in the smartphone application user base has significantly changed the payment system of cab aggregators. Money is preloaded in digital wallets by cab riders, and the service charge is automatically deducted at the destination point without using a two-way authentication process. The latest trend gaining momentum in the market is Technological developments in taxi market.
