Cabinet Pressure Washer is a closed high-pressure cleaning device designed for fine cleaning of small parts, tools and mechanical components. The device is designed as a cabinet structure. During operation, the object to be cleaned is placed in the internal cleaning chamber, and oil, mud, metal chips and other stubborn dirt are removed by high-pressure water jets. Due to its closed working environment, the cabinet pressure washer can not only prevent splashing of water and contaminants during the cleaning process, but also reduce the consumption of water and detergents, ensuring a more efficient and environmentally friendly cleaning operation.
