## Abstracts

According to our (Global Info Research) latest study, the global Cable Accessories market size was valued at USD 41710 million in 2023 and is forecast to a readjusted size of USD 55870 million by 2030 with a CAGR of 4.3% during review period.

A power cable is a combination of a single or multiple electrical conductors that are held together with a complete covering of insulator. These power cables are used to insulate it from the outer environment.

Global cable & accessories market is expected to grow at a sizable CAGR in the forecast period. Key drivers for this market are the burgeoning demand for renewable energy, rapid industrialization and urbanization, globally thriving HVDC projects, and government aids and initiatives to expand and upgrade the existing T&D infrastructure. Upsurge in power capacity on a world scale, offshore wind policies in developing countries, replacement of conventional grids by 'Smart Grids' and upgradation of infrastructure in emerging markets will open new avenues for this market on the forecast horizon. On the other hand, limited funds, complex planning and authorization of projects and the consequent delays in their implementation, steeply priced raw materials, and easily available inexpensive products in grey markets are challenging market growth. Shortage of technical expertise for employing HV projects is also hindering market growth.
