## Abstracts

CAD is a software tool package used for modeling and designing products and components with ease and accuracy. The CAD software package helps engineers, architects, and other design professionals in creating a digital prototype of products. These prototypes are created prior to production. A VAR is a company that resells a software from a software provider by adding features and/or services. The services may include consulting, training, support, and implementation.

### Scope of the Report:

This report studies the CAD in Aerospace and Defense market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the CAD in Aerospace and Defense market by product type and applications/end industries. The growing need to produce quality products at a faster rate will drive the growth prospects for the global CAD market in the aerospace industry during the forecast period. Since CAD software helps in the elimination of multiple prototype development, organizations are increasingly adopting CAD software to design products. This software helps to improve the time-to-market by reducing the product development cycle and testing time. The software also improves the speed of the product design cycle and produces reliable and cost-effective products by reducing the analysis time. Moreover, by reducing the product development cost, the operational efficiency can be enhanced using the CAD software. Furthermore, by using CAD software, organizations can develop quality prototypes that are tested under different environments. The Americas accounted for the maximum market share during 2015 and will continue to dominate the CAD market for the next few years. One of the major factors driving the

market's growth in the region is the US, which has a presence of large aerospace and defense companies in the region such as Lockheed Martin, Raytheon, and Boeing. Also, these companies highly adopt CAD technology for R&D activities that contributes growth to the global CAD market in the aerospace and defense industry. The global CAD in Aerospace and Defense market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.
