Abstracts

A café or coffeehouse is a small restaurant serving coffee, beverages, and light meals.

Scope of the Report:

This report focuses on the Cafes and Bars in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The latest trend gaining momentum in the market is the demand for innovation and customization in food menus. Customers, at present, are looking for a combination of food with new and bold flavor blends. The demand for innovative and exotic foods comes mainly from the millennials. In addition, they are looking for options to customize their meals based on their daily calorie intake. One of the major drivers for this market is the increasing number of cafes. The growing concept of socializing at cafes among the urban youth is expected to drive the market during the forecast period. According to the United Nations, in 2014, over 54% of the world population lived in the urban areas. The growth in the influx of people to urban areas and a substantially large white-collared demographic have brought out an increase in the number of foodservice outlets. Varied tastes and preferences for different types of premium coffee have further led to the emergence of specialty coffee shops. Leading cafe chains such as Starbucks, Costa Coffee, and Dunkin' Brands are opening their outlets in many developing economies of Asia and South America.

The worldwide market for Cafes and Bars is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
