## Abstracts

The global Cage Free Aviary System market size is expected to reach \$ 1036 million by 2032, rising at a market growth of 7.6% CAGR during the forecast period (2026-2032).

In 2025, global sales of Cage Free Aviary Systems reached 185,000 units, with an average selling price of US\$3,250 per unit. Total production capacity was approximately 250,000 units per year, and the gross profit margin remained around 28%. The system mainly consists of corrosion-resistant steel, polypropylene plastic sheets, automatic feeding and watering devices, and intelligent control modules. Upstream materials primarily include steel, plastic sheets, electronic components, and automation modules, while downstream consumption mainly involves feed, water, and cleaning management in poultry farms. Cageless aviary systems improve poultry health and egg production efficiency by providing free movement space, automatic feeding and watering, and environmental control, making them an important investment project for medium- and large-scale egg and broiler farms.

Future development lies in upgrading towards intelligent and environmentally friendly systems, including IoT monitoring, energy-saving lighting, and optimized waste disposal. Simultaneously, with increasing animal welfare requirements in the livestock industry, market demand is steadily growing, with business opportunities concentrated in the renovation of medium- and large-scale farms, export markets, and high-end ecological farming projects.

This report studies the global Cage Free Aviary System production, demand, key manufacturers, and key regions.
