Calamari oil is sourced from food grade squid and contains the highest source of DHA. Calamari or squid oil is rich in Omega-3 fatty acids or polyunsaturated fatty acids (PUFAs) which are essential in normalizing one's metabolism. There are 3 types of omega-3 fatty acids, one is found in plant oils and the other two are found in marine oils. These are alpha-Linolenic acids (ALA), which are found in plant oils, Eicosapentaenoic acid (EPA) and Docosahexaenoic acid (DHA), both found in marine oils. Krill oil and fish oil combined would still not equal to the Omega-3 fatty acids found in calamari oil. Squid oil is specifically rich in DHA, which is good for your total health, brain, skin, heart, eyes, and nervous system.

The market for calamari oil has been experiencing steady growth in recent years, driven by increasing consumer awareness about the importance of omega-3 fatty acids for cardiovascular and cognitive health. The growing demand for dietary supplements, particularly those derived from marine sources, has also contributed to the market's expansion.

The market is divided into different segments based on various factors, including product type, distribution channel, and geography. Calamari oil is available in different forms, such as capsules, soft gels, and liquid oil. It is sold through various distribution channels, including retail stores, online platforms, and specialty stores.

Geographically, the market is segmented into regions such as North America, Europe,

Asia Pacific, Latin America, and the Middle East and Africa. North America and Europe are significant markets for calamari oil due to the high consumer awareness and demand for dietary supplements.
