Additionally, the COVID-19 pandemic has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.

Calcium channel antagonists, also called calcium channel blockers and calcium antagonists (Calcium Antagonists), abbreviated as CCB in English, are a very important class of drugs for the treatment of hypertension. Calcium channel blockers mainly block calcium ion channels on vascular smooth muscle cells, inhibit the influx of extracellular calcium ions, reduce intracellular calcium ion levels, and cause functional changes in cardiovascular and other tissues and organs, thereby dilating blood vessels and

lowering blood pressure. role.
