The global Calcium Hydroxide Powder market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Calcium hydroxide powder is a white powder that forms a paste intended for temporary root canal dressing when mixed with distilled water. When temporisation of the root canal between two appointments is required, calcium hydroxide paste is the standard material to use. The product is intended to eliminate remaining microorganisms and prevent reinfection. The main properties of the calcium hydroxide paste are thanks to its alkaline pH.
