The global Calcium Nitrate Tetrahydrate market size is expected to reach \$ 2614 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Calcium nitrate tetrahydrate (chemical formula $\text{Ca}(\text{NO}_3)_2 \cdot 4\text{H}_2\text{O}$) is a calcium nitrate compound containing water of crystallization. It is typically a white or colorless crystalline powder, readily soluble in water, and highly hygroscopic. It provides calcium ions and nitrate nitrogen, and is therefore commonly used in agriculture as a water-soluble calcium-nitrogen fertilizer. It is suitable for drip irrigation, fertigation, foliar spraying, and compounding with water-soluble fertilizers, promoting crop growth, increasing fruit firmness, and reducing physiological disorders caused by calcium deficiency. Simultaneously, calcium nitrate tetrahydrate can also be used in concrete admixtures, wastewater treatment, refrigeration, antifreeze, rubber latex coagulation, and other chemical fields, making it an important inorganic salt product with both agricultural fertilizer and industrial application value. Global sales in 2025 were approximately 5.39 million tons, with an average price of approximately US\$363 per ton.

In recent years, with the rapid development of modern agriculture, facility cultivation, and efficient fertigation technology globally, calcium nitrate tetrahydrate, as an important solid commodity in the calcium nitrate market, has maintained stable market demand growth. Calcium nitrate tetrahydrate has the chemical formula $\text{Ca}(\text{NO}_3)_2 \cdot 4\text{H}_2\text{O}$, and is usually a white or colorless crystal. It is easily soluble in water, rapidly absorbed, and has a quick fertilizer effect. It can simultaneously provide crops with nitrate nitrogen and absorbable calcium, making it an important raw material in agricultural water-soluble fertilizers, drip irrigation fertilizers, foliar fertilizers, and compound fertilizer systems. Simultaneously, this product also has certain application value in industrial fields such

as building additives, wastewater treatment, refrigeration and antifreeze, and chemical production.

From a demand structure perspective, agriculture is the primary application market for calcium nitrate tetrahydrate. With the expansion of global fruit and vegetable, flower, greenhouse crop, and cash crop planting areas, the demand for efficient calcium and nitrogen nutrition products from the planting sector continues to increase. The nitrate nitrogen in calcium nitrate tetrahydrate can be rapidly absorbed by crops, promoting root and stem growth; calcium helps strengthen cell walls, improve fruit firmness, storage and transport resistance, and commercial quality, and reduces physiological problems caused by calcium deficiency such as fruit cracking, blossom-end rot, and heartburn. Therefore, calcium nitrate tetrahydrate has a wide range of applications in tomatoes, peppers, cucumbers, apples, citrus fruits, grapes, strawberries, and horticultural crops.

In terms of product structure, calcium nitrate tetrahydrate can be classified into agricultural grade, industrial grade, and reagent grade according to its intended use. Agricultural grade products dominate the market and are mainly used in water-soluble fertilizer formulations, drip irrigation, fertigation, and foliar spraying; industrial grade products are used in concrete early-strength agents, antifreeze agents, water treatment, and other chemical applications; reagent grade products are mainly targeted at laboratories and fine chemical industries. In terms of product form, crystalline calcium nitrate tetrahydrate is the most common form on the market, with advantages such as good solubility, high purity, and ease of use; granular products are more suitable for storage, transportation, application, and horticultural scenarios.

In terms of the industry chain, the upstream mainly includes suppliers of nitric acid, limestone, ammonia, and related chemical raw materials; the midstream consists of calcium nitrate tetrahydrate producers; and the downstream covers water-soluble fertilizer companies, fertilizer distributors, agricultural planting companies, building material companies, water treatment companies, and industrial users. The core of industry competition lies in product purity, dissolution rate, impurity control, heavy metal indicators, particle stability, moisture-proof packaging, and channel service capabilities. With the development of high-end agriculture and facility agriculture, high-purity, low-impurity, and easily soluble calcium nitrate tetrahydrate products will be more competitive in the market.

From a regional market perspective, Europe and North America have relatively mature facility agriculture, horticulture, and high-efficiency agricultural systems, resulting in

stable demand for high-quality calcium nitrate tetrahydrate. The Asia-Pacific region is experiencing rapid market growth driven by agricultural modernization, the expansion of cash crop planting, and the promotion of integrated water and fertilizer management, with China, India, and Southeast Asia showing significant potential. Latin America, the Middle East, and Africa are seeing gradually increasing demand driven by the development of fruit and vegetable export agriculture, irrigated agriculture, and facility planting. Overall, the global calcium nitrate tetrahydrate market exhibits a development pattern of stable growth in agricultural demand, high product purity, and diversified applications.

Looking ahead, the global calcium nitrate tetrahydrate market will be driven by three main factors: first, the continued increase in demand for high-efficiency calcium and nitrogen nutrients from fruit and vegetable, horticulture, and greenhouse agriculture; second, the rapid adoption of precision fertilization methods such as drip irrigation, fertigation, and foliar spraying; and third, the steady expansion of demand in the industrial sector for building admixtures, water treatment, and chemical applications. Market growth is not only reflected in increased usage but also in the enhanced value of high-purity, easily soluble, and customized products.

This report studies the global Calcium Nitrate Tetrahydrate production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Calcium Nitrate Tetrahydrate and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Calcium Nitrate Tetrahydrate that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Calcium Nitrate Tetrahydrate total production and demand, 2021-2032, (Tons)

Global Calcium Nitrate Tetrahydrate total production value, 2021-2032, (USD Million)

Global Calcium Nitrate Tetrahydrate production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Tons), (based on production site)

Global Calcium Nitrate Tetrahydrate consumption by region & country, CAGR, 2021-2032 & (Tons)

U.S. VS China: Calcium Nitrate Tetrahydrate domestic production, consumption, key domestic manufacturers and share

Global Calcium Nitrate Tetrahydrate production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Tons)

Global Calcium Nitrate Tetrahydrate production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Tons)

Global Calcium Nitrate Tetrahydrate production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Tons)

This report profiles key players in the global Calcium Nitrate Tetrahydrate market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Yara, Sasol, UralChem, Haifa, Nutrien, Van Iperen International, ADOB Fertilizers, RLF, K+S Aktiengesellschaft, Jiaocheng Tianlong Chemical Industry, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Calcium Nitrate Tetrahydrate market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Tons) and average price (US\$/Ton) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
