Abstracts

The global Calcium Zinc Stabilizer for PVC market size is expected to reach \$ 902 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

Calcium zinc stabilizer is synthesized by special composite process with calcium salt, zinc salt, lubricant, antioxidant, etc. as the main components. It can not only replace toxic stabilizers such as lead cadmium salts and organotin, but also has quite good thermal stability, light stability, transparency and coloring power. Calcium zinc stabilizers for PVC are a type of environmentally friendly heat stabilizers mainly composed of calcium salts and zinc salts as the main active components, and formed by compounding lubricants, antioxidants, and synergistic stabilizers. They are mainly used to inhibit the decomposition reaction of PVC caused by heat during processing and use, thereby improving the thermal stability, processing performance, and service life of the material. This product is widely used in the production of PVC pipes, profiles, wires and cables, sheets, and films, and is currently one of the important solutions to replace lead salt stabilizers and some organic tin stabilizers. In 2025, global Calcium Zinc Stabilizer for PVC production reached approximately 296.43 K MT, with an average global market price of around US\$ 2,089 per MT.

The demand for calcium zinc stabilizers for PVC continues to grow globally, mainly driven by stricter environmental regulations and lead-free trends, especially in the fields of building materials, wires and cables, and consumer goods, where calcium zinc systems have become one of the mainstream stabilizers. With the development of PVC products towards high-performance and green materials, the industry's demand for efficient composite, low additive, and specialized formula products continues to increase. At the same time, enterprises are also strengthening technological upgrades

and large-scale production capacity building. The Asia Pacific region, especially China, remains the fastest-growing market for this product.
