Abstracts

A camcorder is portable electronic device that is used to record live videos and audios for later playback. It helps in the easy recording of events and is used by professionals for filmmaking. The device is capable of recording audio and live-motion videos. It has an imager, lens, and recorder. A camcorder focuses on the light while converting light and electrical signals into digital videos (DVs). DVs can be stored in tapes or tapeless recorders.

Scope of the Report:

This report focuses on the Camcorders in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The entertainment industry has increased its focus towards covering projects for movie productions, television, live events, and concerts. The entertainment industry is dependent on not only the crew, but also on filmmaking equipment such as cameras, camcorders, and tripods. The swift growth of the film industry will have an impact on the entertainment industry. The resultant increase in the revenue generated from concerts and films will drive the demand for camcorders. Safety and security have become very important owing to an increase in the number of crimes, which is leading to the increased demand for smart security systems. Security appliances are designed with the requirement to ensure the protection of people, establishments, homes, and buildings. Smart security systems have a built-in camera or video recorder to capture harmful and suspicious criminal activities.

The worldwide market for Camcorders is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017,

according to a new GIR (Global Info Research) study.
