## Abstracts

Camellia Sinensis Seed Extract is pentacyclic triterpene saponins and glycoside compounds which is extracted from the seed of edible Camellia Sinensis (Pu'er tea, produced in southwestern Yunnan). It can significantly reduce the liquid surface tension as a natural non-ionic surfactant. It has excellent foaming properties (more foaming capacity, good foam stability), and compatible with other ingredients. It also has the effect of balancing oil secretion, so it is suitable for natural mild cleaning and makeup removing products. Because it has an excellent inhibitory effect on candida albicans and aspergillus Niger, and is proved to be safe by 3D cell model experiments, thus it is also suitable for oral care products, female cleaning products and fruit and vegetable cleaners.
