Livestock waterers are devices that dispense water for livestock to drink. They come in a variety of shapes and sizes, and they can be made from different materials such as plastic, metal, or concrete. There are two main types of livestock waterers: automatic and manual. Automatic waterers are connected to a water source such as a hose or well, and they will dispense water when the livestock approaches them. On the other hand, manual waterers need to be filled up with water manually.

Every livestock enterprise, including cattle farming, needs a way to provide a reliable, constant supply of good quality water.
