Abstracts

Camping lights and lanterns are essential sources of power for camping and backpacking tours. Apart from illuminating the camping space, modern camping lanterns come with extra features like Universal Serial Bus (USB) ports to charge one's smartphone or MP3 player, a red light for night vision, a yellow light that keeps insects away, remote control operation, a SOS mode for emergencies, and an additional flashlight. These lights and lanterns are available in a diverse range of styles and can be solar-powered, battery-operated, rechargeable, or hand-cranked.

Scope of the Report:

This report focuses on the Camping Lights and Lanterns in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Several initiatives are being taken by the governments of various countries around the world to promote participation in outdoor activities by providing financial support for the development of affordable campsites, caravan accommodation, and walking, biking, and driving trails. Moreover, governments are ensuring that there are enough accessible parks or community green spaces for children, river restoration and recreation blue ways to power economic strength in communities, and enhanced support for farmers and ranchers who help protect landscapes. These initiatives are expected to encourage adventure sports enthusiasts and campers to invest in camping equipment such as camping lights and lanterns during the predicted period. North America was the market leader during 2016 and is expected to continue its dominance over the next four years. The growth of this market is attributed to the fact that North America has the highest participation rate in camping globally and nearly

25% of all households in the region engage in camping annually. Moreover, the growing interest in outdoor recreational activities among the younger population and increasing preference for traditional camping are some of the major reasons driving this market's growth in the region.

The worldwide market for Camping Lights and Lanterns is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
