Abstracts

According to our (Global Info Research) latest study, the global Camrelizumab market size was valued at US\$ 695 million in 2025 and is forecast to a readjusted size of US\$ 1460 million by 2032 with a CAGR of 6.5% during review period.

Camrelizumab is a humanized anti-PD-1 monoclonal antibody. By specifically binding to the PD-1 receptor on the surface of T cells, it blocks its interaction with the ligands PD-L1 and PD-L2, relieves the suppression of immune cells in the tumor microenvironment, and restores and activates the body's own anti-tumor immune response, thereby exerting a tumor-killing effect. As an immune checkpoint inhibitor independently developed by Hengrui Medicine, this drug features high affinity, long-lasting efficacy and controllable safety. Its approved indications widely cover liver cancer, lung cancer, esophageal cancer, nasopharyngeal cancer, cervical cancer and other tumors. It is often used in combination with chemotherapy and targeted drugs such as famitinib malate, significantly improving survival benefits for patients with advanced malignant tumors, making it one of the most widely used immunotherapeutic drugs in clinical practice in China. In 2025, global Camrelizumab production reached approximately 18.9 million units.

Camrelizumab, a humanized anti-PD-1 monoclonal antibody independently developed by Hengrui Medicine, is one of the core products in the domestic immunotherapy market. With extensive indication coverage, mature combination therapy regimens, medical insurance coverage and channel expansion to primary markets, it occupies an important position in the domestic PD-1 market. Its approved indications cover multiple high-incidence tumors including lung cancer, liver cancer, esophageal cancer, nasopharyngeal cancer and cervical cancer, making it one of the PD-1 products with the most abundant approved indications in China. In the competitive landscape,

camrelizumab forms the first echelon alongside domestic PD-1 inhibitors from companies such as Innovent Biologics, BeiGene and Junshi Biosciences, consolidating its market share through advantages in medical insurance pricing, penetration in grassroots medical markets and superior data from combination therapies. With continuous volume growth driven by medical insurance, expansion of new indications and advancement in overseas markets, its market influence has been steadily rising, establishing it as a benchmark product in the field of tumor immunotherapy in China.
