According to our (Global Info Research) latest study, the global CAN-Bus Device Converters market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

A CAN-bus device converter, also known as a CAN-bus converter or CAN-bus gateway, is a device used to facilitate communication between different Controller Area Network (CAN) networks or devices with varying CAN protocols and data formats. The Controller Area Network is a widely used communication protocol in automotive, industrial, and other applications for transmitting data between various electronic control units (ECUs) and sensors. CAN-bus converters play a crucial role in bridging the gap between different CAN networks or devices that use different communication standards.

The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly.
