CBD isolate is a pure form of CBD. It contains no other cannabis plant compounds. It usually comes from hemp plants, which typically contain very low amounts of THC. CBD isolate is a crystal form of CBD, and it is often ground up and sold as a powder. It may also be called CBD crystals. Isolate is extracted from hemp plant extracts which removes all other cannabinoids, minor cannabinoids, and plant waxes that give hemp its distinct plant smell and flavor. The extraction process leaves behind a white powder or crystalline substance that is 99.9% pure CBD. The purity of Isolate is often only 99.9% due to a small amount of terpenes that are sometimes left behind.
