Abstracts

The global Canned Pet Staple Food market size is expected to reach \$ 4533.6 million by 2029, rising at a market growth of 4.4% CAGR during the forecast period (2023-2029).

According to data from the company's 'Pet Products Research Center', the global pet industry will reach US\$246 billion in 2022, a year-on-year increase of 11.3%. The United States has the highest pet penetration rate and is also the largest pet consumer market. According to data from the American Pet Products Association (APPA), 66% of American households own pets, and the total industry sales are approximately US\$136.8 billion, an increase of 10.8% from 2021. . IVH, the German Pet Products Industry Association, stated that the number of pets in Germany will be as high as 33.4 million in 2022, with a total turnover of nearly 6.5 billion euros. The '2023 China Pet Industry Trend Insights White Paper' released by JD.com shows that China's pet industry is showing a trend of 'red ocean near, blue ocean far away'. In 2023, the number of pet-raising households in China will exceed 100 million, and the market size will reach 129.6 billion yuan. Specifically, the market sizes of the four major physical pet products are all increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 9%. Pet medical care is the pet industry's economic industry second only to pet food. In the UK, annual spending on veterinary and other pet services has increased from ?2.6 billion in 2015 to ?4 billion in 2021, a 54% increase in just six years. Data from Vetnosis shows that the value of the global animal health industry increased by 12% in 2021, reaching \$38.3 billion.

As the name suggests, staple food cans can be used as the main food for pets. Canned pet staple food can be given to pets who don't like pet food. In a sense, if pets

particularly don't like to eat staple food, canned pet staple food can replace the staple food.
