Canned whipped cream is a pre-whipped, aerated dairy product stored in a pressurized canister and dispensed through a nozzle. It typically consists of cream, sugar, stabilizers, and sometimes flavorings or preservatives. The pressurized canister contains nitrous oxide gas, which helps to whip the cream and dispense it in a light, airy form when the nozzle is pressed. Canned whipped cream is commonly used as a convenient topping for desserts, beverages, and other dishes, offering the texture and taste of freshly whipped cream without the need for preparation.
