According to our (Global Info Research) latest study, the global Cantilever Electric Stirrer market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The cantilever electric mixer is composed of a stirring drive host, a frame, a stirring rod, etc., and adopts advanced principles. The motor with a corrugated shell is more convenient for heat dissipation. The advanced friction drive principle not only keeps the speed constant, but also ensures the output torque. Strong and stable. The device realizes stepless speed regulation through the friction wheel drive system, but the motor always runs at a fixed working point, and the power output speed and torque of the motor reach the optimal value at this point and remain basically constant.
