## Abstracts

The global Canvas Primer market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Canvas Primer is used to prepare the canvas and make it paintable. It can also shield the canvas from certain paints. The addition of a layer or two of gesso to the surface of the canvas will help the color in the work stand out. Priming also offers the canvas a smoother surface to work on and improves the flow of the brush. Several kinds of primers are available, like oil primers, acrylic primers, polyvinyl acetate (PVA) primers etc. The most conventional choice for a primer is oil painting primer (also known as a solvent-based primer). Acrylic primers, rather than oil or alkyd-based canvas primers, have become the favored method for oil painting. Acrylic primer pigmentation is carefully regulated to provide enough flexibility to avoid cracking while maintaining enough hardness to keep the tension in place. Polyvinyl acetate (PVA) as a primer is frequently not suggested since it may deteriorate early, leaving the remaining painting without foundation.

This report studies the global Canvas Primer production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Canvas Primer, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
