## Abstracts

A capital lease is a method used by a business for acquisition of equipment with payment structured over time. To give proper definition, it can be expressed as an agreement wherein the lessor receives lease payments for the covering of ownership costs. Moreover, the lessor holds the responsibility of maintenance, taxes, and insurance.

A capital lease is similar to an out-and-out purchase transaction which has been financed through a term loan, in that the payments are made on a monthly basis. However, unlike an out-and-out purchase transaction in that the lessee doesn't present the obligated balance as debt, shows payments as expensed, and retains the equipment title. During the lease period, the finance company is considered as the legal owner of the asset.
