## **Abstracts**

Semiconductor capital spending refers to money spent or funds used by a semiconductor company in producing semiconductor ICs. Semiconductor capital spending includes the repair of semiconductor production equipment or the purchase of equipment.

### **Scope of the Report:**

This report studies the Capital Spending on Memory Devices market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Capital Spending on Memory Devices market by product type and applications/end industries. Portable electronic devices such as smartphones and tablets become obsolete after a short time because of rapid launches of next-version models by vendors. On average, the replacement cycle is 8-12 months. In the past, the replacement period was much longer. Due to the reduction in the product replacement cycle time, the demand for memory devices for newly launched devices is expected to rise drastically, and this will increase the capital spending on memory devices by semiconductor companies, leading to the growth of market.

According to the report, the adoption of communication devices and consumer electronics such as smartphones, tablets, and smart LED TVs is constantly increasing. As a result of advances in the consumer electronics sector, which have seen the emergence of 3D and UHD TVs and hybrid laptops, the demand for NAND flash and DRAM memory devices will also increase steadily during the forecast period, thus leading to an increase in capital spending on memory devices.

The global Capital Spending on Memory Devices market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Capital Spending on Memory Devices.
