Abstracts

According to our (Global Info Research) latest study, the global Capmatinib Hydrochloride Tablets market size was valued at US\$ 185 million in 2025 and is forecast to a readjusted size of US\$ 1195 million by 2032 with a CAGR of 12.6% during review period.

In 2025, global Capmatinib Hydrochloride Tablets production reached approximately 180,000 units. Capmatinib Hydrochloride Tablets are a highly selective mesenchymal–epithelial transition (MET) receptor tyrosine kinase inhibitor and belong to small-molecule oral targeted anticancer drugs. They primarily act by inhibiting the abnormal activation of the MET signaling pathway, thereby blocking tumor cell proliferation, migration, and survival, and play an important role in precision oncology. This drug is mainly used for the treatment of patients with non-small cell lung cancer (NSCLC) harboring MET exon 14 skipping mutations. It is characterized by strong target specificity, proven efficacy, and convenient oral administration, and represents an important therapeutic option in the field of MET-targeted therapies.

Capmatinib Hydrochloride Tablets, as a precision targeted anticancer drug acting on the MET signaling pathway, occupy an important position in the segmented treatment market for non-small cell lung cancer (NSCLC). With the increasing adoption of genetic testing and improved identification of patients with MET exon 14 skipping mutations, the target patient population is gradually expanding, driving steady growth in market demand. Meanwhile, under the trend of precision medicine and personalized therapy, the clinical value of MET inhibitors continues to become more prominent. However, market competition is also intensifying, including from similar MET inhibitors such as Tepotinib as well as other targeted therapies, which pose certain pressures on its

market share. Overall, the market for Capmatinib Hydrochloride Tablets represents a “high-value, small-population” niche, with future growth mainly driven by increased diagnostic penetration, expansion of indications, and global market development.
