Capsule sampling checkweighers are precision instruments used in pharmaceutical and nutraceutical manufacturing to measure the weight of capsules on a sample basis, ensuring they meet specified dosage requirements and regulatory standards. These devices are essential for in-process quality control, allowing manufacturers to detect weight variations, identify potential filling issues, and make real-time adjustments to the capsule filling process. By sampling capsules at set intervals, they help maintain consistent product quality, minimize waste, and ensure compliance with Good Manufacturing Practices (GMP).
