Car Body Stickers, also known as decals, are adhesive graphics or designs applied to the surface of vehicles, primarily for decoration, personalization, advertising, or informational purposes. They are made from various materials, with vinyl being the most common due to its durability and weather-resistant properties.

With the decline in the price of car stickers and the improvement of the requirements for the use of the car body, many car stickers have changed their uses, such as being used to stick KT plates for display.
