According to our (Global Info Research) latest study, the global Car Dumpers market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Car dumpers or wagon tippers are material handling equipment used for unloading materials from railroad cars, gondolas, or lorries. They are used for the unloading of non-perishable goods. This is done by tipping the car dumpers, which helps in emptying the loaded wagons. The tippler holds the wagon from the top and the side by using clamping devices. There are other auxiliary equipment used for the functioning of car dumpers, such as wheel grippers and wagon marshaling equipment. Car dumpers are operated either by using a hydraulic drive or an electro-mechanical drive.

The non-metallic mineral sector includes cement, sand clay, and gravel materials. The construction sector propels the demand for mineral reserves. Augmented consumption of sand, stone, cement, and gravel in the construction industry is the major factor driving the demand for car dumpers.
