## Abstracts

The global Car Navigation market size is expected to reach \$ 36340 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

A car navigation system is part of the automobile controls or a third party add-on used to find direction in an automobile. It typically uses a satellite navigation device to get its position data which is then correlated to a position on a road. When directions are needed routing can be calculated. On the fly traffic information can be used to adjust the route.

Dead reckoning using distance data from sensors attached to the drivetrain, a gyroscope and an accelerometer can be used for greater reliability, as GPS signal loss and/or multipath can occur due to urban canyons or tunnels.

Global Car Navigation key players include Bosch, Denso, Pioneer, Alpine, etc. Global top four manufacturers hold a share about 35%.

China is the largest market, with a share over 30%, followed by Europe, and USA, both have a share about 35 percent.

In terms of product, Android Platform is the largest segment, with a share over 50%. And in terms of application, the largest application is Aftermarket, followed by OEM.
